## HARNETT COUNTY COMPREHENSIVE GROWTH PLAN

### FUTURE LAND USE PLAN

The Harnett community envisions a future where the county will continue to grow and prosper in a way that promotes a high quality of life, capitalizes on and protects the assets that make Harnett County unique, and ensures that all Harnett residents have access to a variety of housing, transportation, recreation and employment options.

### FUTURE LAND USE CATEGORIES/ RESIDENTIAL AREAS

**Agricultural and Rural Residential:** Primarily agricultural and forestry uses with some rural residential areas. These areas are located outside of existing and future sewer service areas and rely on septic systems for wastewater treatment. They have a limited road network and, in some cases, lie within High Quality Watershed or Water Supply Watershed areas. The lack of utility and transportation infrastructure, the established low density development pattern and ongoing agricultural activities in these areas contribute to their rural character. This character can be enhanced by encouraging only low intensity uses, single family residential up to one unit per acre and context sensitive rural design.

### LAND USE GOALS & STRATEGIES

LU-2: Encourage growth where infrastructure exists.

LU-4: Accommodate a mixture of housing types in appropriate areas.
